

Market forecast: What is the Semiconductor Outlook by Product and Markets
Jim Feldhan, President, Semico Research Corp.

The semiconductor industry is a half a trillion-dollar market! Artificial Intelligence, Machine Learning, Automotive, 5G, IoT, consumer and computing applications all have growing semiconductor demand. Where is the semiconductor industry headed of the next five years?

This presentation will detail Semico's forecast by major semiconductor devices and the influences end applications have on the forecast.

Memory has been flying high for the past few years, how long will that last and what will the size of the DRAM and NAND markets be in 2023. In addition, the presentation will provide forecasts for Micro Logic, Linear, Discrete, Sensors and Opto.
