

**Smart Manufacturing - Connected Intelligence Platform Enables Insight**  
**YoungSeok Kim, Sr. Solution Consultant, TIBCO Software Korea**

Smart Manufacturing and Industry 4.0 Initiatives are transforming the manufacturing landscape. Smart Factories, products, and services are being powered by the latest machine learning technologies, streaming sensor data, and real-time monitoring technologies. Leading manufacturers and equipment vendors are already gaining competitive advantage through improved product quality, equipment utilization, throughput, efficiency, and profitability. In this session, we'll introduce how you can maximize the value of all your process, equipment and product data by TIBCO Connected Intelligence Platform to empower your entire organization.
